E-Scooter Safety Tips

1. Ride solo. Doubling up is a no-no.
2. Steer clear of sidewalks, keep your scooter in the bike lane.
3. The most common injury associated with e-scooters are head traumas, wear a helmet!
4. Look out for, and avoid, safety hazards such as potholes, gravel and oil slicks.
5. Slow down and keep speeds below 15 mph.

Safe riding warriors!

Scooter injury? Campus Health Center can help! Call and make an appointment at 313-577-5041.
